PERSONAL PROJECTS

RESIDENCIA(HOTEL ROOM BOOKING USING BLOCKCHAIN) (01/2023 - 04/2023)

- Residencia Application is a decentralized program that applies Blockchain technology to provide guaranteed secure, private hotel reservations.
- Residencia Software facilitates a direct channel between businesses and travelers, making it possible to transact in real time without having to pay fees to any middleman.
- The purpose of Residencia (Hotel Room Booking Using Blockchain) is to do away with the additional expenses charged by a third party and promote direct dialogue between hotel vendors and buyers.

STACK OVERFLOW-CLONE (02/2023 - 03/2023)

- Stack Overflow Clone is built entirely on the MERN Stack framework.
- From this website, individuals can log in and sign up with authentication. Moreover, they have the option to pose questions, comment on inquiries, vote positively or negatively, share content, and delete questions and answers.
- Extra features such as Chatbot and One-Time Password Authentication have been included in the Ask Question section.
- [GitHub Repository](#).

WORK EXPERIENCE

Full-Stack Web Development Intern NullClass

02/2023 - 04/2023

India

Achievements/Tasks

- Developed authorization with bcrypt.js (salt-hashing) and the back-end functionalities utilizing express.js and MongoDB database.
- Created a front-end interface using React.js and established communication with the backend.
- Used redux.js for storage management in the front end.
- Being able to manipulate databases, proxies, application programming interfaces, version control systems, and external services.
